PAPERWORK REDUCTION ACT (PRA) PUBLIC BURDEN STATEMENT

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0990-0221. The time required to complete this information collection is estimated to average 36 hours per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: U.S. Department of Health and Human Services, OS/OIRM/PRA, 200 Independence Ave., S.W., Suite 336-E, Washington, DC 20201, Attention: PRA Reports Clearance Officer.

This page intentionally left blank.

INTRODUCTION

This annual reporting requirement is for family planning services delivery projects authorized and funded under the Population Research and Voluntary Family Planning Programs (Section 1001 of Title X of the Public Health Service Act, 42 United States Code [USC] 300).¹ The Office of Population Affairs (OPA) administers the Title X Family Planning Program.

Annual submission of the Family Planning Annual Report (FPAR) is required of all Title X family planning services grantees for purposes of monitoring and reporting program performance (45 Code of Federal Regulations [CFR] Part 75²). FPAR data are presented in summary form to protect the confidentiality of individuals who receive Title X-funded services (42 CFR Part 59).³

The FPAR is the only source of annual, uniform reporting by all Title X family planning services grantees. It provides consistent, national-level data on the Title X Family Planning Program and its users. Information from the FPAR is important to OPA for several reasons. First, OPA uses FPAR data to monitor compliance with statutory requirements, regulations, and operational guidance set forth in the Title X program requirements,⁴ which include the following:

- monitoring compliance with legislative mandates, such as giving priority in the provision of services to low-income persons [42 USC 300 §1006(c)]¹
- ensuring that Title X grantees and their subcontractors provide a broad range of family planning methods and services [42 USC 300 §1001(a)]¹

Second, OPA uses FPAR data to comply with accountability and federal performance requirements for Title X family planning funds as required by the Government Performance and Results Modernization Act of 2010. Current performance measures focus on increasing access to family planning services and serving individuals and families from underserved, vulnerable, and low-income populations. Objectives for the Title X Family Planning program include increasing the number of unintended pregnancies averted by providing Title X family planning services, with priority for services to low-income individuals; increasing the proportion of women using highly or moderately effective methods of contraception; reducing invasive cervical cancer through cervical cancer screening; and reducing infertility through chlamydia screening.

¹ 42 United States Code (USC) 300 et seq. (1970). *Title X—Population research and voluntary family planning programs: Project grants and contracts for family planning services (Section 1001[300])*. Retrieved from https://opa.hhs.gov/sites/default/files/2020-07/title-x-statute-attachment-a_0.pdf

² 45 Code of Federal Regulations (CFR) Part 75. (2020, November 6). Uniform administrative requirements, cost principles, and audit requirements for HHS awards. Retrieved from <https://www.ecfr.gov/cgi-bin/retrieveECFR?gp=&SID=88c2f29440664f74c9444e7ff44bab5a&mc=true&n=pt45.1.75&r=PART&ty=HTML>

³ 42 Code of Federal Regulations (CFR) Part 59 Subpart A. (2020, November 6). Project grants for family planning services. Retrieved from <https://www.ecfr.gov/cgi-bin/text-idx?SID=c1cbd72e13f7230f1e8328fa52b57899&mc=true&node=sp42.1.59.a&rgn=div6>

⁴ The Title X program requirements consist of the following two documents: (1) Compliance with statutory program integrity requirements (“Title X Final Rule”) retrieved from <https://opa.hhs.gov/grant-programs/title-x-service-grants/title-x-statutes-regulations-and-legislative-mandates> and (2) Providing quality family planning services: Recommendations from CDC and the U.S. Office of Population Affairs (“QFP”) and updates (2015 and 2017) to the Recommendations retrieved from <https://opa.hhs.gov/grant-programs/title-x-service-grants/about-title-x-service-grants/quality-family-planning>

Finally, OPA relies on FPAR data to guide strategic and financial planning, to monitor performance, and to respond to inquiries from policymakers and Congress about the program. The FPAR allows OPA to assemble comparable and relevant program data to answer questions about the characteristics of the population served by Title X projects, the use of family planning and related preventive health services offered, the amount and composition of revenues, and program impact. FPAR data are the basis for objective grant reviews, program evaluation, and assessment of program technical needs.

This version (November 2021) of the FPAR consists of 15 tables, including a Grantee Profile Cover Sheet and 14 data tables. The data collected include demographic, social, and economic characteristics of family planning users; use of family planning and related preventive health services; use of health personnel; and project revenues. Changes to this version of the *FPAR Forms and Instructions* include the following:

- Updated references throughout the document
- Updated the first question and the response in the “Questions About” section for all FPAR tables
- In Table 7, updated the row heading and reporting guidance for Row 12 (“Any spermicide or non-spermicidal gel [used alone]”) to allow grantees to report female users whose primary contraceptive method is non-spermicidal gel.
- In Table 7, updated the reporting guidance for Row 11 (“Female condom”) and Row 17 (“Male condom”).
- In Table 8, updated the reporting guidance for Row 2 (“Male condom”) and Row 6 (“Rely on female method[s]”).

GENERAL INSTRUCTIONS

This section provides general instructions for completing the FPAR. Grantees should use the general instructions in conjunction with the table-specific instructions; they are cross-referenced where appropriate. If you need additional information or guidance, please refer to the Title X program requirements⁴ and *Program Policy Notices* (<https://opa.hhs.gov/grant-programs/title-x-service-grants/about-title-x-service-grants/program-policy-notices>) on the OPA Website.

WHO SUBMITS AN FPAR?

Grantees funded under Section 1001 of the Title X Public Health Service Act (42 USC 300)¹ are required to submit the FPAR. The family planning services grantee is the direct recipient of the Title X grant. Subrecipients (delegates or subcontractors) to the grantee receive Title X funds via the grantee. Subrecipients should **not** submit an FPAR report; instead, subrecipients should follow grantee instructions for collecting and reporting FPAR-related data to the grantee.

SCOPE OF ACTIVITIES REPORTED IN THE FPAR

The purpose of the FPAR is to provide a comprehensive view of the family planning activities within the scope of the grantee's Title X-funded project, as defined in the approved grant application. Family planning services grantees should report the total, unduplicated number of users, encounters, and other outputs from activities that are within the scope of a grantee's Title X-funded project. **If you have questions about whether to include certain data in this report, contact your Project Officer (PO).**

FPAR SUBMISSION DUE DATE

Grantees should prepare and submit the FPAR no later than February 15 after the end of the reporting period. If February 15 is a weekend day or federal holiday, the FPAR is due on the following Monday or next business day.

SUBMITTING THE FPAR

OPA encourages grantees to submit the FPAR electronically using the Web-based *FPAR Data System*, which is located at <https://fpar.opa.hhs.gov/>. You must have an authorized user account to submit and manage your FPAR using the system. Contact your PO to request a user account. Once OPA authorizes your account, you will receive an automated e-mail confirming your registration and providing a link to the *FPAR Data System* website, your user name, and a temporary password that you will be required to change at first login.

Visit the *FPAR Data System* Training page at <https://fpar.opa.hhs.gov/Public/Training> to learn about and view on-demand training videos and to access Section 508-compliant slides and handouts for each course. An *FPAR Data System User Guide*, accessed from the Support page, provides step-by-step instructions for using the system to submit and manage your FPAR.

If you are unable to submit the FPAR using the *FPAR Data System*, contact your PO to determine the best way (e.g., e-mail or fax) to send the PO an electronic or hardcopy version of the completed FPAR tables. Once the PO receives the completed tables, they will record the date of receipt and enter the FPAR data into the *FPAR Data System*. Once the FPAR data have been entered into the *FPAR Data System*, all subsequent actions related to your FPAR will be performed using the *FPAR Data System*.

FPAR DATA VALIDATION

FPAR data undergo rigorous electronic and manual validations prior to tabulation. For FPARs submitted through the *FPAR Data System*, the system automatically validates the data as you complete each table to ensure consistency within and across tables. Each validation procedure is based on a validation rule that defines which table cells to compare and what condition or validation test to apply (e.g., =, <, >, ≤, or ≥). The values reported in FPAR Table 1, Row 10, indicated by the double-letter identifiers (AA, BB, and CC), serve as important checkpoint references to ensure consistency across multiple FPAR tables. The automated validation procedures include cross-table comparisons to these three FPAR checkpoints, as well as comparisons between other table cells. The system will flag blank cells. If the value for a cell is zero, enter “0.”

After a grantee submits an FPAR, it goes through two levels of review by HHS staff. First, a PO reviews the FPAR and either accepts it or returns it to the grantee for correction or clarification. Once the PO accepts the FPAR, the FPAR Data Coordinator performs a second and final review, either accepting the FPAR or returning it to the PO and grantee for correction or clarification. When the FPAR Data Coordinator has accepted all FPARs, the FPAR data contractor performs additional electronic validations (“post-submission validations”) to identify reporting errors and highlight reporting issues (e.g., missing or out-of-range values). The contractor also performs a manual review of all “Note” field comments.

REQUEST FOR FPAR REVISION

During the Department of Health and Human Services (HHS) review of the FPAR or after the FPAR contractor has completed post-submission validations, HHS staff may ask you to correct or provide additional information about the reported data. If the PO requests a revision, the FPAR contact for your agency will receive an automated e-mail from the *FPAR Data System* that includes revision instructions. If the FPAR Data Coordinator requests a revision, the PO will receive the automated e-mail and will contact the FPAR contact for your agency to determine who (PO or grantee) will enter the correction or clarification using the *FPAR Data System*.

If you are unable to revise the FPAR using the *FPAR Data System*, contact your PO to request assistance. Grantees should consult with their PO regarding any requirements or deadlines for submitting revised FPAR tables.

FPAR NOTE FIELD

OPA encourages grantees to use the table-specific “Note” field to provide information about the data reported in the FPAR tables, including grantee observations and information about trends or any issues affecting the quality or completeness of the reported data. In the *FPAR Data System*, the “Note” field appears under every FPAR table. Please reference the cell or cells to which each comment applies. If the data that you report is an estimate, please describe the rationale and method for generating the estimate. The System also includes a “Note” field under the FPAR Preparation Checklist where grantees may enter comments about issues affecting data in all FPAR tables.

FPAR IDENTIFICATION

Each FPAR table includes a header with key identifying information. For grantees that use the *FPAR Data System* to submit the FPAR, these fields will populate automatically. For grantees that submit a hardcopy FPAR by fax or e-mail, you must enter this information on the Grantee Profile Cover Sheet and in the fields above all tables. The identifying information includes the following:

FPAR NUMBER – Enter the unique, **four-digit FPAR number** assigned to your agency by the FPAR Data Coordinator. This number is different from your HHS grant number.

DATE SUBMITTED – Enter the report submission date.

REPORTING PERIOD – Enter the reporting period covered by your FPAR report. In most cases, the reporting period is the 12-month calendar year (i.e., **January 1 through December 31**). Title X grantees that begin operating after January 1, stop operating before December 31, or are reporting data for a different 12-month period (e.g., December to November) should enter the date range for the period during which their Title X project was active and for which they are reporting data. For grantees that submit the FPAR using the *FPAR Data System*, please consult the *FPAR Data System User Guide* for instructions about editing the reporting period that appears above the FPAR Preparation Checklist.

INITIAL SUBMISSION OR REVISION – Check the appropriate box in the header of each table to indicate whether the table is an initial or revised submission. For grantees that submit the FPAR using the *FPAR Data System*, the system will automatically update the submission status (initial or revised) of each table.

This page intentionally left blank.

TERMS AND DEFINITIONS

OPA provides definitions for key FPAR terms to ensure uniform reporting by Title X grantees. The terms describe the individuals receiving family planning and related preventive health services at Title X-funded service sites, the range and scope of the services provided, and the family planning providers who deliver care.

FAMILY PLANNING USER

A family planning user is an individual who has at least one family planning encounter during the reporting period. The same individual may be counted as a family planning user only once during a reporting period. Grantees should follow the table-specific instructions to identify applicable users.

FAMILY PLANNING PROVIDER

A family planning provider is the individual who assumes primary responsibility for assessing a client and documenting services in the client record. Providers include those agency staff that exercise independent judgment as to the services rendered to the client during an encounter. Two general types of providers deliver Title X family planning services: Clinical Services Providers and Other Services Providers.

CLINICAL SERVICES PROVIDERS – Include physicians (family and general practitioners, specialists), physician assistants, nurse practitioners, certified nurse midwives, and registered nurses with an expanded scope of practice who are trained and permitted by state-specific regulations to perform *all aspects* of the user (male and female) physical assessments recommended for contraceptive, related preventive health, and basic infertility care. Clinical Services Providers are able to offer client education, counseling, referral, followup, and clinical services (physical assessment, treatment, and management) relating to a client’s proposed or adopted method of contraception, general reproductive health, or infertility treatment, in accordance with the Title X program requirements.⁴

OTHER SERVICES PROVIDERS – Include other agency staff (e.g., registered nurses, public health nurses, licensed vocational or licensed practical nurses [LPNs], certified nurse assistants, health educators, social workers, or clinic aides) that offer client education, counseling, referral, or followup services relating to the client’s proposed or adopted method of contraception, general reproductive health, or infertility treatment, as described in the Title X program requirements. Other Services Providers may also perform or obtain samples for routine laboratory tests (e.g., urine, pregnancy, sexually transmitted disease [STD], and cholesterol and lipid analysis), give contraceptive injections (e.g., Depo-Provera), and perform routine clinical procedures that may include some aspects of the user physical assessment (e.g., blood pressure evaluation), in accordance with the Title X program requirements.⁴

FAMILY PLANNING ENCOUNTER

A **family planning encounter** is a documented contact between an individual and a family planning provider that is either face-to-face in a Title X service site or virtual using telehealth technology. The purpose of a family planning encounter is to provide family planning and related preventive health services to female and male clients who want to avoid unintended pregnancies or achieve intended pregnancies. To be counted for purposes of the FPAR, a written record of the services provided during the family planning encounter must be documented in the client record.

A virtual family planning encounter uses telecommunications and information technology to provide access to Title X family planning and related preventive health services, including assessment, diagnosis, intervention, consultation, education and counseling, and supervision, at a distance. Telehealth technologies include telephone, facsimile machines, electronic mail systems, videoconferencing, store-and-forward imaging, streaming media, remote monitoring devices, and terrestrial and wireless communications.

There are two types of family planning encounters: (1) family planning encounters with a Clinical Services Provider and (2) family planning encounters with an Other Services Provider. The type of family planning provider who renders the care, regardless of the services rendered, determines the type of family planning encounter. Although a client may meet with both Clinical and Other Services Providers during an encounter, the provider with the highest level of training, who takes ultimate responsibility for the client's clinical or non-clinical assessment and care during the encounter, is credited with the encounter.

FAMILY PLANNING ENCOUNTER WITH A CLINICAL SERVICES PROVIDER – A documented, face-to-face or virtual encounter between a family planning client and a Clinical Services Provider.

FAMILY PLANNING ENCOUNTER WITH AN OTHER SERVICES PROVIDER – A documented, face-to-face or virtual encounter between a family planning client and an Other Services Provider.

Laboratory tests and related counseling and education, in and of themselves, do not constitute a family planning encounter unless there is face-to-face or virtual contact between the client and provider, the provider documents the encounter in the client's record, and the tests are accompanied by family planning counseling or education.

FAMILY PLANNING SERVICE SITE

A family planning service site refers to an established unit where grantee or subrecipient agency staff provide Title X services (clinical, counseling, educational, or referral), either through face-to-face or virtual contact, that comply with the Title X program requirements, and where at least some of the encounters between the family planning providers and the individuals served meet the requirements of a family planning encounter. Established units include clinics, hospital outpatient departments, homeless shelters, detention and correctional facilities, and other locations where Title X agency staff provide these family planning services. Service sites may also include equipped mobile vans or schools.

CLIENT RECORDS

Title X projects **must** establish a **medical record** for every family planning user who obtains clinical services or other screening or laboratory services (e.g., blood pressure check, urine-based pregnancy or STD test). The medical record contains personal data; a medical history; physical exam data; laboratory test orders, results, and followup; treatment and special instructions; scheduled revisits; informed consent forms; documentation of refusal of services; and information on allergies and untoward reactions to identified drugs. The medical record also contains clinical findings; diagnostic and therapeutic orders; and documentation of continuing care, referral, and followup. The client medical record **must** contain sufficient information to identify the client, indicate where and how the client can be contacted, justify the clinical impression or diagnosis, and warrant the treatment and end results. The client medical record must also include data that enable the Title X site to complete their required FPAR reporting. The medical record allows for entries by counseling and social service staff. The medical record is a confidential record, accessible only to authorized staff and secured by lock when not in use.

If a family planning user receives no clinical services during a face-to-face or virtual family planning encounter, the provider must still establish a **client record** that enables the site to complete the required FPAR data reporting. Like a medical record, this client record **must** contain sufficient information to

identify the client, indicate where and how the client can be contacted, and fully document the encounter. This record is confidential, accessible only to authorized staff, and secured by lock when not in use.

QUESTIONS ABOUT FPAR TERMS AND DEFINITIONS

1. **QUESTION** – Are the definitions for any of the key FPAR terms different from their definition in the *Title X FPAR Forms and Instructions (Reissued January 2021)*?

ANSWER – OPA has made no changes to the definitions of key FPAR terms in the November 2021 version of the *Title X FPAR Forms and Instructions*.

2. **QUESTION** – Can a client have more than one family planning encounter during a single, family planning visit?

ANSWER – A client may have **only one** family planning encounter **per visit**. In the family planning services setting, the term “encounter” is synonymous with “visit.” Although a client may meet with both Clinical and Other Services Providers during an encounter, the encounter is credited to the provider with the highest level of training who takes ultimate responsibility for the client’s clinical or non-clinical assessment and care during the visit.

3. **QUESTION** – If an individual receives gynecological or related preventive health services (e.g., pelvic exam, Pap test, pregnancy test, STD screening) at a Title X-funded service site, but does not receive counseling, education, or clinical services aimed at avoiding unintended pregnancy or achieving intended pregnancy, is the encounter a family planning encounter? Is the client a family planning user?

ANSWER – If the individual is an *ongoing* family planning user who visits the service site to obtain any type of family planning or related preventive health services, the encounter is considered a family planning encounter, and the client is considered a family planning user.

If a client of reproductive age is sterilized under the service site’s Title X-funded project or is an ongoing Title X user who was sterilized elsewhere but continues to receive gynecological or related preventive health services from the site, the encounter is considered a family planning encounter, and the agency may continue to count the client as a family planning user.

If a post-menopausal client obtains gynecological or related preventive health services, the encounter is not a family planning encounter, and the client is not a family planning user.

If a client is not an ongoing family planning user and obtains a service that does not include counseling, education, or clinical services related to achieving intended pregnancy or avoiding unintended pregnancy, the encounter is not a family planning encounter, and the client is not a family planning user.

Example: A new client who receives STD services, but no counseling, education, or clinical services aimed at avoiding an unintended pregnancy or achieving an intended pregnancy, is not a family planning user, and the encounter is not a family planning encounter. If, in addition to STD testing, this same client receives condoms or counseling about using condoms to prevent STD transmission, but does not receive counseling, education, or clinical services aimed at avoiding an unintended pregnancy, the client is not a family planning user, and the encounter is not a family planning encounter.

4. **QUESTION** – If a clinic aide or nurse is trained and authorized to give contraceptive injections (e.g., Depo-Provera), should an agency report the encounter as an encounter with a Clinical Services Provider?

ANSWER – No. For purposes of reporting on the FPAR, a clinic aide is classified as an Other Services Provider even though they may be trained and authorized to give contraceptive injections. Only physicians, physician assistants, advanced practice nurses (certified nurse midwife or nurse practitioner), or registered nurses with an expanded scope of practice who are trained and permitted by state-specific regulations to perform *all aspects* of the user (male and female) physical assessments recommended for contraceptive, related preventive health, and basic infertility care may be reported as Clinical Services Providers. Report full-time equivalents (FTEs) for each type of Clinical Services Provider in Table 13, Rows 1a to 1c, and the number of encounters with Clinical Services Providers in Table 13, Row 1. Report the number of encounters with Other Services Providers in Table 13, Row 2.

GRANTEE PROFILE COVER SHEET

The Grantee Profile Cover Sheet provides important identifying and contact information for the grantee and the grantee's FPAR contact. The Cover Sheet also provides information about the network of service providers supported by the Title X grant.

INSTRUCTIONS

If you are submitting the FPAR using the *FPAR Data System*, the system will automatically populate the following fields: grantee legal name; address of grantee administrative offices; and name, title, and contact information for the Title X Project Director. If there is an error in the pre-populated fields, enter the corrected information in the Grantee Profile Cover Sheet "Note" field and notify the PO that key grant information has changed. Grantees can modify all other fields.

For grantees submitting a hardcopy FPAR by e-mail or fax, follow these instructions:

GRANTEE LEGAL NAME – Enter the name of the legal recipient of the Title X family planning services grant.

ADDRESS OF GRANTEE ADMINISTRATIVE OFFICES – Enter the grantee's complete address, including nine-digit ZIP code.

TITLE X PROJECT DIRECTOR – Enter the name, title, mailing address, phone and fax numbers, and e-mail address for the agency representative responsible for directing the grantee's Title X project.

For grantees submitting the FPAR using the *FPAR Data System* or in hardcopy, follow these instructions:

GRANTEE CONTACT PERSON (PERSON COMPLETING THE FPAR) – Enter the name, title, mailing address, phone and fax numbers, and e-mail address for the agency representative with primary responsibility for preparing the FPAR.

NUMBER OF SUBRECIPIENTS (DELEGATES OR SUBCONTRACTORS) SUPPORTED BY THE TITLE X GRANT – Report the number of subrecipients (delegates or subcontractors) that receive funding through the grantee's Title X service grant.

NUMBER OF FAMILY PLANNING SERVICE SITES SUPPORTED BY THE TITLE X GRANT – Report the total number of family planning service sites supported by the Title X grant and represented in the FPAR data. If the number of service sites supported by the Title X grant is different from the number provided in the grant application, check the box and explain the reason for this difference in the Grantee Profile Cover Sheet "Note" field.

QUESTIONS ABOUT THE GRANTEE PROFILE

1. **QUESTION** – Is the Grantee Profile Cover Sheet different from the previous version of the table in the *Title X FPAR Forms and Instructions (Reissued January 2021)*?

ANSWER – OPA has made no changes to the Grantee Profile Cover Sheet in the November 2021 version of the *Title X FPAR Forms and Instructions*.

2. **QUESTION** – If Title X services are provided at a clinic and two non-clinic service sites, should the grantee report one or three sites as the total number of service sites supported by the Title X grant?

ANSWER – For purposes of FPAR reporting, the grantee should count and report any established unit, clinic, or non-clinic site where staff provide Title X services and where at least some of the encounters between the family planning providers and the individuals served meet the requirements of a *family planning encounter*. Refer to the definition of a “Family Planning Service Site” on page 8. OPA assumes that each of the sites reported in the Grantee Profile contributes data to the grantee’s FPAR. If all three sites in this example contribute data to the FPAR, the grantee should include these three service sites in the total number of sites reported on the Grantee Profile Cover Sheet.

FAMILY PLANNING USER DEMOGRAPHIC PROFILE

Data reported in Tables 1 through 3 allow program administrators to monitor access to and use of Title X services among the diverse population these projects aim to serve. These FPAR tables describe the demographic characteristics of family planning users, including the distribution of users by age group, sex, ethnicity, and race.

The numbers reported in Table 1, Row 10, serve as consistency checkpoints in subsequent FPAR tables. The values in these tables are identified with **unique, double-letter identifiers** (AA, BB, and CC).

INSTRUCTIONS

TABLE 1 – Report the unduplicated number of family planning users by age group and sex.

TABLE 2 – Report the unduplicated number of *female* family planning users by race and ethnicity.

TABLE 3 – Report the unduplicated number of *male* family planning users by race and ethnicity.

TERMS AND DEFINITIONS

AGE GROUP – Categorize family planning users based on their age as of June 30 of the reporting period.

RACE AND ETHNICITY – The categories for reporting ethnicity and race in the FPAR conform to the Office of Management and Budget (OMB) 1997 *Revisions to the Standards for the Classification of Federal Data on Race and Ethnicity*⁵ and are used by other HHS programs and compilers of such national data sets as the National Survey of Family Growth. If an agency wants to collect data for ethnicity or race subcategories, the agency must be able to aggregate the data reported into the OMB minimum standard set of ethnicity and race categories.

OMB encourages self-identification of race. When respondents are allowed to self-identify or self-report their race, agencies should adopt a method that allows respondents to mark or select more than one of the five minimum race categories. *Appendix A* to this form provides general guidance and a list of resources regarding collection of multi-race responses.

The **two** minimum OMB categories for reporting ethnicity are as follows:

HISPANIC OR LATINO (ALL RACES) – A person of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin, regardless of race.

NOT HISPANIC OR LATINO (ALL RACES) – A person **not** of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin, regardless of race.

⁵ Office of Management and Budget. (1997, October 30). Revisions to the standards for the classification of federal data on race and ethnicity. *Federal Register*, 62(210), 58782-58790. Retrieved from <https://www.govinfo.gov/content/pkg/FR-1997-10-30/pdf/97-28653.pdf>

The **five** minimum OMB categories for reporting race are as follows:

AMERICAN INDIAN OR ALASKA NATIVE – A person having origins in any of the original peoples of North and South America (including Central America), and who maintains tribal affiliation or community attachment.

ASIAN – A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam.

BLACK OR AFRICAN AMERICAN – A person having origins in any of the black racial groups of Africa.

NATIVE HAWAIIAN OR OTHER PACIFIC ISLANDER – A person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific islands.

WHITE – A person having origins in any of the original peoples of Europe, the Middle East, or North Africa.

QUESTIONS ABOUT TABLES 1 THROUGH 3

1. **QUESTION** – Is Table 1, Table 2, or Table 3 different from the previous version of the table in the *Title X FPAR Forms and Instructions (Reissued January 2021)*?

ANSWER – OPA has made no changes to Table 1, Table 2, or Table 3 in the November 2021 version of the *Title X FPAR Forms and Instructions*.

2. **QUESTION** – What if a client self-identifies as Hispanic or Latino, but was born in the United States?

ANSWER – Report as Hispanic or Latino family planning users of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin, including those Hispanic or Latino users who were born in the United States.

3. **QUESTION** – Should clients from Brazil, Haiti, or Portugal or who are of Brazilian, Haitian, or Portuguese descent be classified as Hispanic or Latino?

ANSWER – All clients who self-identify as Hispanic or Latino should be classified as Hispanic or Latino regardless of the country of origin. Clients who identify solely as Brazilian, Haitian, or Portuguese should not be classified as Hispanic or Latino.

4. **QUESTION** – What if a client does not self-identify with any of the OMB minimum standard race categories?

ANSWER – According to the 1997 OMB guidance, all races are represented in Tables 2 and 3, and technically, every client should be included in one of these categories. Nevertheless, a client may not self-identify with any of the five minimum OMB race categories or may refuse to report their race. Providers must respect a client's right to refuse to report their race or to self-identify with any of the race categories. Providers may wish to include the definition of each race category on their intake forms (if space and formatting permit) and to familiarize themselves with the OMB definitions for each race category so they can assist clients who have questions. Grantees should report the number of users with missing or unknown race information in the "unknown/not reported" race category.

Hispanic or Latino clients account for a high proportion of family planning users for whom race data are unknown or not reported. The structure of Tables 2 and 3 allows OPA to identify the numbers of female and male Hispanic or Latino clients who do not self-identify with any of the OMB race categories.

5. **QUESTION** – What if a client self-identifies with more than one of the five minimum OMB race categories?

ANSWER – According to the 1997 OMB guidance, when self-identification is used, the data collection method should allow clients to self-report more than one race. A single “multiracial” category should not appear as an option on the intake form. At a minimum, the client intake form should list the five minimum OMB race categories, and clients should be instructed to check or select “one or more” or “all that apply.” Report clients who self-identify with two or more races in Row 6 of Table 2 (female users) or Table 3 (male users).

Appendix A to this form provides general guidelines and a sample question for collecting multi-race responses. Please note that the information in *Appendix A* is not comprehensive and serves only to highlight important considerations and ideas for handling multi-race response. Grantees interested in issues surrounding collection of race data should consult the resource list in *Appendix A*.

FAMILY PLANNING USER ECONOMIC AND SOCIAL PROFILE

The data reported in Tables 4 through 6 provide OPA with information on key social and economic characteristics of individuals who receive family planning and related preventive health care in Title X-funded service sites. OPA uses these data to monitor the program's role in supporting the health care safety net for individuals who confront financial or sociocultural barriers to care due to low income, lack of health insurance, or limited English proficiency (LEP). In addition, OPA uses these data to assess the program's compliance with legislative or regulatory mandates, including priority care to individuals who are low-income and ensuring meaningful access to clients with LEP.⁶

INSTRUCTIONS

TABLE 4 – Report the unduplicated number of family planning users by family/household income level.

TABLE 5 – Report the unduplicated number of family planning users by their principal health insurance coverage status.

TABLE 6 – Report the unduplicated number of family planning users with LEP.

TERMS AND DEFINITIONS

INCOME LEVEL AS A PERCENTAGE OF THE HHS POVERTY GUIDELINES – Grantees are required to collect family income data from all users in order to determine charges based on the schedule of discounts.³ In determining a user's family/household income, agencies should refer to the poverty guidelines updated periodically in the *Federal Register* by HHS under the authority of 42 USC 9902(2).⁷ Report the unduplicated number of users by family/household income level, using the most current income information available.

PRINCIPAL HEALTH INSURANCE COVERING PRIMARY MEDICAL CARE – Refers to public and private health insurance plans that provide a **broad set of primary medical care benefits** to enrolled individuals. Report the most current (i.e., at last encounter) health insurance coverage information available for the client even though they may not have used this health insurance to pay for family planning services received during their last encounter. For individuals who have coverage under more than one health plan, **principal insurance** is defined as the insurance plan that the agency would bill first (i.e., primary) if a claim were to be filed. Categories of health insurance covering primary medical care include public and private sources of coverage.

PUBLIC HEALTH INSURANCE COVERING PRIMARY MEDICAL CARE – Refers to federal, state, or local government health insurance programs that provide a **broad set of primary medical care benefits** for eligible individuals. Examples of such programs include Medicaid (both regular and managed

⁶ U.S. Department of Health and Human Services. (2003, August 4). *Guidance to federal financial assistance recipients regarding Title VI prohibition against national origin discrimination affecting limited English proficient persons* ("Revised HHS LEP guidance"). *Federal Register*, 68(153), 47311-47323. Retrieved from <https://www.hhs.gov/civil-rights/for-individuals/special-topics/limited-english-proficiency/guidance-federal-financial-assistance-recipients-title-vi/index.html>

⁷ U.S. Department of Health and Human Services, Office of the Assistant Secretary for Planning and Evaluation, (2020). *U.S. federal poverty guidelines used to determine financial eligibility for certain federal programs*. Retrieved from <https://aspe.hhs.gov/poverty-guidelines>

care), Medicare, the Children's Health Insurance Program (CHIP), and other state or local government programs that provide a broad set of benefits. Also included are public-paid or public-subsidized private insurance programs.

PRIVATE HEALTH INSURANCE COVERING PRIMARY MEDICAL CARE – Refers to health insurance coverage through an employer, union, or direct purchase that provides a **broad set of primary medical care benefits** for the enrolled individual (beneficiary or dependent). Private insurance includes insurance purchased for public employees or retirees or military personnel and their dependents (e.g., TRICARE or Civilian Health and Medical Program of the Department of Veterans Affairs [CHAMPVA]).

UNINSURED – Refers to clients who **do not have a public or private health insurance plan that covers broad, primary medical care benefits**. Clients whose services are subsidized through state or local indigent care programs, or clients insured through the Indian Health Service who obtain care in a non-participating facility, are considered uninsured. **Do not count** users as uninsured if they did not use their medical insurance to pay for their visit.

LIMITED ENGLISH PROFICIENT (LEP) USERS – Refers to family planning users who do not speak English as their primary language and who have a limited ability to read, write, speak, or understand English.⁶ Because of their limited English proficiency, LEP users derive little benefit from Title X services and information provided in English. In Table 6, report the unduplicated number of family planning users who required language assistance services (interpretation or translation) to optimize their use of Title X services. **Include as LEP any user** who received Title X services from bilingual staff in the user's preferred non-English language, who was assisted by a competent agency or contracted interpreter, or who opted to use a family member or friend as an interpreter after refusing the provider's offer of free language assistance services. Service providers should consult the *Revised HHS LEP Guidance*⁶ for further information about identifying LEP individuals and complying with language assistance requirements. Unless they are also LEP, **do not include users** who are visually or hearing impaired or have other disabilities.

QUESTIONS ABOUT TABLES 4 THROUGH 6

1. **QUESTION** – Is Table 4, Table 5, or Table 6 different from the previous version of the table in the *Title X FPAR Forms and Instructions (Reissued January 2021)*?

ANSWER – OPA has made no changes to Table 4, Table 5, or Table 6 in the November 2021 version of the *Title X FPAR Forms and Instructions*.

2. **QUESTION** – If a client has health insurance that covers a broad set of primary medical care benefits, including some or all family planning services, but they choose not to use their health insurance plan to pay for some or all of the cost of services, how should an agency classify this client for purposes of Table 5 reporting?

ANSWER – Although an insured client may elect not to use their health insurance to pay for services, they are considered insured and should be reported in either Row 1 or Row 2 of the table according to the type of health insurance coverage (public or private) that they have.

3. **QUESTION** – Are Title X agencies required to verify client health insurance status?

ANSWER – No. The information required to complete Table 5 is based on clients' self-reported insurance coverage. However, as stipulated in the program regulations (see 42 CFR Part 59.5(a)(9)),³ service providers are required to bill all third parties authorized or legally obligated to pay for services and to make reasonable efforts to collect charges without jeopardizing client confidentiality.

4. **QUESTION** – How do I classify a client who has coverage for a specific type of care or health condition—for example, dental services or expanded Medicaid coverage under the Breast and Cervical Cancer Prevention and Treatment Act of 2000—but has no health insurance that provides a broad set of primary medical care benefits?

ANSWER – Users who do not have a health insurance plan that provides a broad set of primary medical care benefits, even though they may have coverage for a specific condition, are considered uninsured.

5. **QUESTION** – If a client’s services are paid by a state’s Medicaid family planning eligibility expansion program (i.e., waiver demonstration project or State Plan Amendment [SPA]), are they considered insured for purposes of Table 5?

ANSWER – A client whose services are paid by a Medicaid family planning eligibility expansion (waiver or SPA) is considered **uninsured** if they have **no coverage under another public or private insurance plan** that covers a broad set of primary medical care benefits. A Medicaid family planning eligibility expansion program that covers **only** family planning services does not cover a “broad set of primary medical care benefits.”

A client whose services are paid by a Medicaid family planning eligibility expansion is considered **insured** if they have a public or private insurance plan that covers a **broad set of primary medical care benefits**.

6. **QUESTION** – In Table 6, should a user be reported as LEP if they receive care from a bilingual provider in their preferred, non-English language or if they receive language assistance from a trained (agency, contracted, or telephonic) or informal (friend or family member) interpreter?

ANSWER – In Table 6, report the number of users who are **best served** in a language other than English, including clients who received care from bilingual providers in their preferred, non-English language or received language assistance from trained or informal interpreters.

Confidentiality, privacy, conflicts of interest, and competence as medical services interpreters are several limitations of using family members or friends as interpreters in the Title X clinic setting. While in some cases an LEP client may feel more comfortable when a trusted family member or friend acts as an interpreter, the family member or friend may not be competent to provide quality and accurate interpretations, particularly if the service provided is complex or not of a routine nature. If a client opts to provide their own interpreter, and the service provider determines at any point during the service that the client’s interpreter is not competent in this role, the service provider should obtain the services of a competent interpreter.⁶

FAMILY PLANNING METHOD USE

Title X projects are required to provide a broad range of acceptable and effective, medically approved family planning methods and services.³ Tables 7 and 8 provide sex- and age-specific information on the types of family planning methods that female and male clients use to prevent unintended pregnancy. In addition, the tables provide information on the numbers of female and male clients who reported using no method, including the reason for non-use.

Information on method use by age group for female (Table 7) and male (Table 8) users allows OPA to track patterns in method use over time at the state, regional, and national levels. In addition, these data allow OPA to examine the extent to which Title X providers contribute to increased access to and use of a broad range of acceptable and effective contraceptive methods, to monitor performance on contraceptive care measures,⁸ and to assess the program's contribution to national health objectives (i.e., Healthy People) for family planning and disease prevention. These data also permit OPA to compare the data from Title X clinics with other sources of information, including the National Survey of Family Growth.

INSTRUCTIONS

TABLE 7 – Report the unduplicated number of female family planning users by primary method of family planning and age group.

TABLE 8 – Report the unduplicated number of male family planning users by primary method of family planning and age group.

TERMS AND DEFINITIONS

AGE GROUP – Use the client's age as of June 30 of the reporting period.

PRIMARY METHOD OF FAMILY PLANNING – The primary method of family planning is the user's method—adopted or continued—at the time of exit from their last encounter in the reporting period. If the user reports that they are using more than one family planning method, report the most effective one as the primary method.⁹ Family planning methods include the following:

FEMALE STERILIZATION – In **Table 7**, report the number of female users who rely on female sterilization as their primary family planning method. Female sterilization refers to a contraceptive surgical (tubal ligation) or non-surgical (implant) procedure performed on a female user in the current or any previous reporting period.

INTRAUTERINE DEVICE OR SYSTEM (IUD/IUS) – In **Table 7**, report the number of female users who use a long-term hormonal or other type of intrauterine device (IUD) or system (IUS) as their primary family planning method.

⁸ Office of Population Affairs. (2019). *Performance measures: Contraceptive care measures*. Retrieved from <https://opa.hhs.gov/evaluation-research/title-x-services-research/contraceptive-care-measures>

Marrazzo (Eds.). *Contraceptive technology* (21st ed., pp. 829–927). New York, NY: Ayer Company Publishers, Inc. Retrieved from <http://www.contraceptivetechnology.org/wp-content/uploads/2013/09/Contraceptive-Failure-Rates.pdf>

HORMONAL IMPLANT – In **Table 7**, report the number of female users who use a long-term, subdermal hormonal implant as their primary family planning method.

1-MONTH HORMONAL INJECTION – In **Table 7**, report the number of female users who use 1-month injectable hormonal contraception as their primary family planning method.

3-MONTH HORMONAL INJECTION – In **Table 7**, report the number of female users who use 3-month injectable hormonal contraception as their primary family planning method.

ORAL CONTRACEPTIVE – In **Table 7**, report the number of female users who use any oral contraceptive, including combination and progestin-only (“mini-pills”) formulations, as their primary family planning method.

CONTRACEPTIVE PATCH – In **Table 7**, report the number of female users who use a transdermal contraceptive patch as their primary family planning method.

VAGINAL RING – In **Table 7**, report the number of female users who use a hormonal vaginal ring as their primary family planning method.

CERVICAL CAP OR DIAPHRAGM – In **Table 7**, report the number of female users who use a cervical cap or diaphragm (with or without spermicidal jelly or cream) as their primary family planning method.

CONTRACEPTIVE SPONGE – In **Table 7**, report the number of female users who use a contraceptive sponge as their primary family planning method.

FEMALE CONDOM – In **Table 7**, report the number of female users who use female condoms (with or without a spermicide or non-spermicidal gel) as their primary family planning method.

ANY SPERMICIDE OR NON-SPERMICIDAL GEL (USED ALONE) – In **Table 7**, report the number of female users who use only (i.e., not in conjunction with another contraceptive method) spermicidal jelly, cream, gel, foam, film, or suppository or non-spermicidal gel as their primary family planning method.

FERTILITY AWARENESS METHOD (FAM) OR LACTATIONAL AMENORRHEA METHOD (LAM) – Fertility awareness-based methods (FAMs) refer to family planning methods that rely on identifying the fertile days in each menstrual cycle when intercourse is most likely to result in a pregnancy. FAMs include Standard Days, Calendar Rhythm, TwoDay, Billings Ovulation, and SymptoThermal methods. The Lactational Amenorrhea Method (LAM) is the proactive application of exclusive breastfeeding during lactational amenorrhea for the first 6 months after delivery.¹⁰ For LAM to ensure adequate protection from an unplanned pregnancy, the following conditions must be met: (1) infant is less than 6 months of age, (2) no periods or spotting since delivery (i.e., amenorrhea), (3) exclusive or fully breastfeeding (i.e., no other liquid or solid given to infant) or nearly fully breastfeeding (i.e., infrequent supplementation in small amounts, but not by bottle), and (4) frequent or on-demand breastfeeding (i.e., no interval longer than 4 to 6 hours between breastfeeds).¹¹

In **Table 7**, report the number of female users who use one or a combination of the FAMs listed above or who rely on LAM as their primary family planning method.

¹⁰ Kennedy, K. I., & Goldsmith, C. (2018). Contraception after pregnancy. In R. A. Hatcher, A. L. Nelson, J. Trussell, C. Cwiak, P. Cason, M. S. Policar, A. R. A. Aiken, J. Marrazzo, & D. Kowal (Eds.), *Contraceptive technology* (21st ed., pp. 511–542). New York, NY: Ayer Company Publishers, Inc.

¹¹ U.S. Centers for Disease Control and Prevention. (2017). U.S. medical eligibility criteria for contraceptive use: Lactational amenorrhea method. Retrieved from <https://www.cdc.gov/reproductivehealth/contraception/mmwr/mec/appendixg.html>

In **Table 8**, Row 3, report male users who rely on a FAM as their primary method. Report male users who rely on LAM as their primary method in **Table 8**, Row 6, “Rely on female method(s).”

ABSTINENCE – In **Tables 7 and 8**, report the number of female and male users, respectively, who rely on abstinence as their primary family planning method or who are not currently sexually active and therefore not using contraception. For purposes of FPAR reporting, abstinence is defined as refraining from oral, vaginal, and anal intercourse.¹²

WITHDRAWAL AND OTHER METHODS – In **Tables 7 and 8**, report the number of female and male users, respectively, who use withdrawal or other methods not listed in the tables as their primary family planning method.

METHOD UNKNOWN OR NOT REPORTED – In **Tables 7 and 8**, report the number of female and male users, respectively, for whom the primary family planning method at exit from the last family planning encounter is unknown or not reported.

NO METHOD—[PARTNER] PREGNANT OR SEEKING PREGNANCY – In **Tables 7 and 8**, report the number of female and male users, respectively, who are not using any family planning method because they (**Table 7**) or their partners (**Table 8**) are pregnant or seeking pregnancy.

NO METHOD—OTHER REASON – In **Tables 7 and 8**, report the number of female and male users, respectively, who are not using any family planning method to avoid pregnancy due to reasons other than pregnancy or seeking pregnancy, including if either partner is sterile without having been sterilized surgically, if either partner has had a non-contraceptive surgical procedure that has rendered them unable to conceive or impregnate, or if the user has a sexual partner of the same sex.

VASECTOMY – Refers to conventional incisional or no-scalpel vasectomy performed on a male user, or the male partner of a female user, in the current or any previous reporting period. In **Table 7**, report the number of female users who rely on vasectomy as their (partner’s) primary family planning method. In **Table 8**, report the number of male users on whom a vasectomy was performed in the current or any previous reporting period.

MALE CONDOM – In **Table 7**, report the number of female users who rely on their sexual partner to use male condoms (with or without a spermicide or non-spermicidal gel) as their primary family planning method. In **Table 8**, report the number of male users who use male condoms (with or without a spermicide or non-spermicidal gel) as their primary family planning method.

RELY ON FEMALE METHOD(S) – In **Table 8**, report the number of male family planning users who rely on their female partners’ family planning methods as their primary methods. “Female” contraceptive methods include female sterilization, IUD/IUS, hormonal implants, 1- and 3-month hormonal injections, oral contraceptives, the contraceptive patch, the vaginal ring, cervical cap or diaphragm, the contraceptive sponge, female condoms, LAM, spermicides, and non-spermicidal gel.

QUESTIONS ABOUT TABLES 7 AND 8

1. **QUESTION** – Is **Table 7** or **Table 8** different from the previous version of the table in the *Title X FPAR Forms and Instructions (Reissued January 2021)*?

ANSWER – To account for the increased use of non-spermicidal contraceptive gel (Phexxi®), OPA updated the November 2021 version of the *Title X FPAR Forms and Instructions*. OPA changed the heading for **Table 7** Row 12 from “Spermicides (used alone)” to “Any spermicide or non-spermicidal gel (used alone)” and updated the reporting guidance for **Table 7** Row 11 (“Female condom”),

¹² Centers for Disease Control and Prevention. (2020). *How you can prevent sexually transmitted diseases: Abstinence*. Retrieved from <https://www.cdc.gov/std/prevention/default.htm>

Row 12 (“Any spermicide or non-spermicidal gel [used alone]”), and Row 17 (“Male condom”) and for Table 8 Row 2 (“Male condom”) and Row 6 (“Rely on female method[s]”).

2. **QUESTION** – If family planning users, male or female, rely on their partners’ family planning method for pregnancy prevention, how should the grantee report this information in Table 7 or 8?

ANSWER – If a female family planning user relies on a male family planning method (e.g., vasectomy or male condoms) for pregnancy prevention, report this user in Table 7, Row 16 or 17. If the female user relies on withdrawal, report this user in Table 7, Row 15 (“Withdrawal or other method”).

If a male family planning user relies on a “female” family planning method for pregnancy prevention (i.e., female sterilization, IUD, hormonal implant, 1- or 3-month hormonal injection, oral contraceptives, contraceptive patch, vaginal ring, cervical cap or diaphragm, contraceptive sponge, female condoms, LAM, spermicide, or non-spermicidal gel), report this user in Table 8, Row 6.

If a male client and his female sexual partner rely on pills (for pregnancy prevention) and condoms (for STD or pregnancy prevention), record the method that is most effective in terms of pregnancy prevention (i.e., pills). In this example, the male user’s family planning method would be “Rely on female method(s)” (Table 8, Row 6). If this same male client were to report that he relies on condoms for pregnancy prevention because of his partner’s inconsistent pill use, report male condoms (Table 8, Row 2) as this client’s primary contraceptive method.

3. **QUESTION** – How should a grantee report a user who exits the encounter with no method because they or their sexual partner has had a non-contraceptive surgical procedure that has rendered one of the two sexual partners unable to conceive or impregnate?

ANSWER – Report female users in Table 7, Row 19 (“No method–Other reason”) and male users in Table 8, Row 8 (“No method–Other reason”).

CERVICAL AND BREAST CANCER SCREENING

Tables 9 and 10 provide information on the cervical and breast cancer screening activities that are performed within the scope of a grantee's approved Title X project. Data from these tables permit OPA to monitor achievement of program performance objectives and adoption of cervical and breast cancer screening recommendations established by federal agencies and professional medical organizations.^{13,14} In addition, OPA uses these data to assess the number of abnormal results that require further followup and to assess the program's contribution to national health objectives (i.e., Healthy People) related to early cancer detection and health promotion.

INSTRUCTIONS

TABLE 9 – Report the following information on cervical cancer screening activities. Refer to the chart in *Exhibit 1* for reporting information on Pap test results:

- Unduplicated number of female users who obtained a Pap test
- Number of Pap tests performed
- Number of Pap tests with an ASC or higher result according to the 2014 Bethesda System¹⁵ (see *Exhibit 1*). ASC or higher results include ASC-US; ASC-H; LSIL; HSIL; squamous cell carcinoma; AGC; AGC, favor neoplastic; endocervical AIS; adenocarcinoma; or other malignant neoplasms
- Number of Pap tests with an HSIL or higher result according to the 2014 Bethesda System¹⁵ (see *Exhibit 1*). HSIL or higher results include HSIL; squamous cell carcinoma; AGC; AGC, favor neoplastic; endocervical AIS; adenocarcinoma; or other malignant neoplasms

TABLE 10 – Report the following information on breast cancer screening and referral activities:

- Unduplicated number of female users receiving a clinical breast exam (CBE)
- Unduplicated number of female users referred for further evaluation based on CBE results

TERMS AND DEFINITIONS

TESTS or Exams – Report the number of Pap tests or CBEs performed during the reporting period that are provided within the scope of the grantee’s Title X project.

SQUAMOUS CELL ABNORMALITIES – The 2014 Bethesda System¹⁵ (see *Exhibit I*) classifies squamous cell abnormalities into the following categories:

- **Atypical squamous cells of undetermined significance (ASC-US) or atypical squamous cells, cannot exclude HSIL (ASC-H)** – ASC is a finding of abnormal squamous cells in the tissue lining the outer part of the cervix. ASC-US is the most common abnormal finding in a Pap test. An ASC-US result may be caused by a human papillomavirus (HPV), a benign growth (e.g., cyst or polyp), or low hormone levels in menopausal women. ASC-H may be a sign of a high-grade squamous intraepithelial lesion (HSIL), which may become cervical cancer if untreated.¹⁶
- **Low-grade squamous intraepithelial lesion (LSIL)** is a finding of slightly abnormal cells on the surface of the cervix caused by certain types of HPV. LSIL is a common abnormal finding on a Pap test. Mild dysplasia and cervical intraepithelial neoplasia (CIN) 1 are other terms for referring to LSILs.¹⁶
- **High-grade squamous intraepithelial lesion (HSIL)** is a growth on the surface of the cervix with moderately or severely abnormal cells. HSILs are usually caused by certain types of HPV. If not treated, these abnormal cells may become cancer and spread to normal tissue.¹⁶ HSIL encompasses moderate dysplasia (CIN 2) or severe dysplasia and carcinoma in situ (CIN 3).¹⁶
- **Squamous cell carcinoma** is a finding of cancer in the squamous cells of the cervix.

GLANDULAR CELL ABNORMALITIES – The 2014 Bethesda System¹⁵ (see *Exhibit I*) classifies glandular cell abnormalities into the following categories:

- **Atypical glandular cells (AGCs)** is a finding of abnormal cells that come from glands in the walls of the cervix. The presence of these abnormal cells may be a sign of more serious lesions or cancer.¹⁶ The 2014 Bethesda System¹⁵ (see *Exhibit I*) subdivides AGCs into two categories:
 - AGC—endocervical, endometrial, or glandular cells—not otherwise specified
 - AGC—endocervical or glandular cells—favor neoplastic.
- **Endocervical adenocarcinoma in situ (AIS)** is a finding of abnormal cells found in the glandular tissue lining the endocervical canal. AIS may become cancer and spread to nearby normal tissue.¹⁶
- **Adenocarcinoma** is a finding of cancer in endocervical, endometrial, extrauterine, or not otherwise specified glandular tissue.¹⁶

QUESTIONS ABOUT TABLES 9 AND 10

1. **QUESTION** – Is Table 9 or Table 10 different from the previous version of the table in the *Title X FPAR Forms and Instructions (Reissued January 2021)*?

ANSWER – OPA has made no changes to Table 9 or Table 10 in the November 2021 version of the *Title X FPAR Forms and Instructions*.

¹⁶ National Cancer Institute. (2016). *NCI dictionary of cancer terms*. Retrieved from <https://www.cancer.gov/publications/dictionaries/cancer-terms>

2. **QUESTION** – How should grantees count and report a CBE that is part of a “bundled” billing or service code (e.g., as part of a comprehensive exam)?

ANSWER – Grantees who do not have a count of the actual number of CBEs performed because of the structure of the “bundled” billing or service code should report the *estimated* number of CBEs performed in Table 10, Row 1, and provide a brief explanation about the estimated figure in the Table 10 “Note” field.

3. **QUESTION** – In Table 9, does the total number of Pap tests reported in Row 3 include tests reported in Row 4?

ANSWER – Yes. Table 9, Row 3, will include the tests reported in Row 4 because tests with a result of HSIL or higher are also tests with a result of ASC or higher.

Exhibit 1. The 2014 Bethesda System

SPECIMEN TYPE:

Indicate conventional smear (Pap smear) vs. liquid-based preparation vs. other

SPECIMEN ADEQUACY

- Satisfactory for evaluation (describe presence or absence of endocervical/transformation zone component and any other quality indicators, e.g., partially obscuring blood, inflammation, etc.)
- Unsatisfactory for evaluation (specify reason)
 - Specimen rejected/not processed (specify reason)
 - Specimen processed and examined, but unsatisfactory for evaluation of epithelial abnormality because of (specify reason)

GENERAL CATEGORIZATION (optional)

- Negative for Intraepithelial Lesion or Malignancy
- Other: See Interpretation/Result (e.g., endometrial cells in a woman ≥ 45 years of age)
- Epithelial Cell Abnormality: See Interpretation/Result (specify 'squamous' or 'glandular' as appropriate)

INTERPRETATION/RESULT

NEGATIVE FOR INTRAEPITHELIAL LESION OR MALIGNANCY

(When there is no cellular evidence of neoplasia, state this in the General Categorization above and/or in the Interpretation/Result section of the report—whether or not there are organisms or other non-neoplastic findings)

Non-Neoplastic Findings (optional to report)

- Non-neoplastic cellular variations
 - o Squamous metaplasia
 - o Keratotic changes
 - o Tubal metaplasia
 - o Atrophy
 - o Pregnancy-associated changes
- Reactive cellular changes associated with:
 - Inflammation (includes typical repair)
 - o Lymphocytic (follicular) cervicitis
 - Radiation
 - Intrauterine contraceptive device (IUD)
- Glandular cells status post hysterectomy

Organisms

- Trichomonas vaginalis*
- Fungal organisms morphologically consistent with *Candida* spp.
- Shift in flora suggestive of bacterial vaginosis
- Bacteria morphologically consistent with *Actinomyces* spp.
- Cellular changes consistent with herpes simplex virus
- Cellular changes consistent with cytomegalovirus

OTHER

- Endometrial cells (in a woman ≥ 45 years of age) (Specify if "negative for squamous intraepithelial lesion")

EPITHELIAL CELL ABNORMALITIES

SQUAMOUS CELL

- Atypical squamous cells
 - of undetermined significance (ASC-US)
 - cannot exclude HSIL (ASC-H)
- Low-grade squamous intraepithelial lesion (LSIL) (encompassing: HPV/mild dysplasia/CIN 1)
- High-grade squamous intraepithelial lesion (HSIL) (encompassing: moderate and severe dysplasia, CIS; CIN 2 and CIN 3)
 - with features suspicious for invasion (if invasion is suspected)
- Squamous cell carcinoma

GLANDULAR CELL

- Atypical
 - endocervical cells (NOS or specify in comments)
 - endometrial cells (NOS or specify in comments)
 - glandular cells (NOS or specify in comments)
- Atypical
 - endocervical cells, favor neoplastic
 - glandular cells, favor neoplastic
- Endocervical adenocarcinoma in situ
- Adenocarcinoma
 - endocervical
 - endometrial
 - extrauterine
 - not otherwise specified (NOS)

OTHER MALIGNANT NEOPLASMS: (specify)

ADJUNCTIVE TESTING

Provide a brief description of the test method(s) and report the result so that it is easily understood by the clinician.

COMPUTER-ASSISTED INTERPRETATION OF CERVICAL CYTOLOGY

If case examined by an automated device, specify device and result.

EDUCATIONAL NOTES AND COMMENTS APPENDED TO CYTOLOGY REPORTS (optional)

Suggestions should be concise and consistent with clinical follow-up guidelines published by professional organizations (references to relevant publications may be included).

SEXUALLY TRANSMITTED DISEASE (STD) SCREENING

Tables 11 and 12 provide information on STD testing activities that are performed within the scope of a grantee's approved Title X project. Data from these tables permit OPA to monitor compliance with legislative mandate, achievement of program performance objectives, and adoption of STD and human immunodeficiency virus (HIV) screening recommendations established by federal agencies and professional medical organizations.¹⁷ In addition, OPA uses these data to assess the program's contribution to national health objectives (i.e., Healthy People) for disease prevention (e.g., STDs and HIV) and health promotion.

INSTRUCTIONS

TABLE 11 – Report the unduplicated number of family planning users tested for chlamydia, by age group (under 15, 15–17, 18–19, 20–24, and 25 and over) and sex.

TABLE 12 – Report the following STD testing information:

- Number of gonorrhea tests performed, by sex
- Number of syphilis tests performed, by sex
- Number of confidential HIV tests performed, by sex
- Number of confidential HIV tests with a positive result
- Number of anonymous HIV tests performed

TERMS AND DEFINITIONS

AGE GROUP – Use the client's age as of June 30 of the reporting period.

TESTS – Report STD (chlamydia, gonorrhea, and syphilis) and HIV (confidential and anonymous) tests performed during the reporting period that are provided within the scope of the grantee's Title X project. Do not report tests performed in an STD clinic operated by the Title X-funded agency unless the activities of the STD clinic are within the defined scope of the agency's Title X project.

QUESTIONS ABOUT TABLES 11 AND 12

1. **QUESTION** – Is Table 11 or Table 12 different from the previous version of the table in the *Title X FPAR Forms and Instructions (Reissued January 2021)*?

ANSWER – OPA has made no changes to Table 11 or Table 12 in the November 2021 version of the *Title X FPAR Forms and Instructions*.

2. **QUESTION** – How should grantees that fund agencies operating co-located Title X and STD clinics report STD tests?

ANSWER – Do not report tests performed in an STD clinic operated by the Title X-funded agency or co-located with the Title X-funded service site unless (1) the activities of the STD clinic are within the defined scope of the grantee's Title X project and (2) the STD tests are provided to clients who meet the FPAR user and encounter definitions (see pages 7 and 8). A client seeking STD services,

¹⁷ Centers for Disease Control and Prevention. (2021, July 21). *Sexually transmitted infections treatment guidelines, 2021*. Retrieved from <https://www.cdc.gov/std/treatment-guidelines/STI-Guidelines-2021.pdf>

who refuses family planning counseling, information, or services that are offered, should not be reported as a family planning user.

3. **QUESTION** – In Table 12, Row 3, should grantees count and report confirmatory HIV tests separately from initial HIV tests (i.e., one versus two tests)?

ANSWER – To the extent possible, a grantee should report all HIV tests—initial and confirmatory—performed within the scope of their Title X projects, including HIV tests performed on site and tests for which a specimen is collected on site and analyzed off site (e.g., laboratory). If an offsite laboratory performs a confirmatory test using the same specimen obtained for the initial test, grantees should not count the confirmatory test unless (1) the provider has billing or other transaction records to document that the laboratory performed a second/confirmatory test and (2) compiling and reporting confirmatory test counts do not pose an undue burden. Grantees should use the Table 12 “Note” field to explain if HIV test counts exclude confirmatory tests.

4. **QUESTION** – Should grantees include *preliminary* positive rapid HIV tests in the total number of positive HIV test results reported in Table 12, Row 4?

ANSWER – No. The total number of confidential positive HIV tests should include only the number of standard (i.e., not rapid) HIV tests with a positive result and the number of *preliminary* positive rapid HIV tests **confirmed** to be positive.

FAMILY PLANNING ENCOUNTERS AND CLINICAL SERVICES PROVIDER STAFFING

Table 13 provides OPA with information on the number and type of family planning encounters, and the number of full-time equivalent (FTE) Clinical Services Providers who deliver Title X-funded family planning and related preventive health services.

INSTRUCTIONS

TABLE 13 – Report the following provider staffing and encounter data:

- Number of FTE family planning Clinical Services Providers, by type of provider
- Number of family planning encounters (face-to-face and virtual) with Clinical Services Providers
- Number of family planning encounters (face-to-face and virtual) with Other Services Providers
- In the Table 13 Note field, please describe the number of total family planning encounters with Clinical Services Providers (Row 1, Column B) that are virtual encounters and the number of total encounters with Other Services Providers (Row 2, Column B) that are virtual encounters.

TERMS AND DEFINITIONS

FAMILY PLANNING PROVIDER – A family planning provider is the individual who assumes primary responsibility for assessing a client and documenting services in the client record. Providers include those agency staff that exercise independent judgment as to the services rendered to the client during an encounter. Two general types of providers deliver Title X family planning services: Clinical Services Providers and Other Services Providers.

CLINICAL SERVICES PROVIDERS – Include physicians (family and general practitioners, specialists), physician assistants, nurse practitioners, certified nurse midwives, and registered nurses with an expanded scope of practice who are trained and permitted by state-specific regulations to perform *all aspects* of the user (male and female) physical assessments recommended for contraceptive, related preventive health, and basic infertility care. Clinical Services Providers are able to offer client education, counseling, referral, followup, and clinical services (physical assessment, treatment, and management) relating to a client's proposed or adopted method of contraception, general reproductive health, or infertility treatment, in accordance with the Title X program requirements.⁴

OTHER SERVICES PROVIDERS – Include other agency staff (e.g., registered nurses, public health nurses, licensed vocational or LPNs, certified nurse assistants, health educators, social workers, or clinic aides) that offer client education, counseling, referral, or followup services relating to the client's proposed or adopted method of contraception, general reproductive health, or infertility treatment, as described in the Title X program requirements.⁴ Other Services Providers may also perform or obtain samples for routine laboratory tests (e.g., urine, pregnancy, STD, and cholesterol and lipid analysis), give contraceptive injections (e.g., Depo-Provera), and perform routine clinical procedures that may include some aspects of the user physical assessment (e.g., blood pressure evaluation), in accordance with the Title X program requirements.⁴

FAMILY PLANNING ENCOUNTER – A family planning encounter is a documented contact between an individual and a family planning provider that is either face-to-face in a Title X service site or virtual using telehealth technology. The purpose of a family planning encounter—whether clinical or non-clinical—is to provide family planning and related preventive health services to female and male clients who want to avoid unintended pregnancies or achieve intended pregnancies. To be counted for purposes of the FPAR, a written record of the services provided during the family planning encounter must be documented in the client record.

A virtual family planning encounter uses telecommunications and information technology to provide access to Title X family planning and related preventive health services, including assessment, diagnosis, intervention, consultation, education and counseling, and supervision, at a distance. Telehealth technologies include telephone, facsimile machines, electronic mail systems, videoconferencing, store-and-forward imaging, streaming media, remote monitoring devices, and terrestrial and wireless communications.

There are two types of family planning encounters: (1) family planning encounters with a Clinical Services Provider and (2) family planning encounters with an Other Services Provider. The type of family planning provider who renders the care, regardless of the services rendered, determines the type of family planning encounter. Although a client may meet with both Clinical and Other Services Providers during an encounter, the provider with the highest level of training, who takes ultimate responsibility for the client’s clinical or non-clinical assessment and care during the encounter, is credited with the encounter.

FAMILY PLANNING ENCOUNTER WITH A CLINICAL SERVICES PROVIDER – A documented, face-to-face or virtual encounter between a family planning client and a Clinical Services Provider.

FAMILY PLANNING ENCOUNTER WITH AN OTHER SERVICES PROVIDER – A documented, face-to-face or virtual encounter between a family planning client and an Other Services Provider.

Laboratory tests and related counseling and education, in and of themselves, do not constitute a family planning encounter unless there is face-to-face or virtual contact between the client and provider, the provider documents the encounter in the client’s record, and the tests are accompanied by family planning counseling or education.

FULL-TIME EQUIVALENT (FTE) – For each type of Clinical Services Provider, report the time in FTEs that these providers are involved in the direct provision of Title X-funded services (i.e., engaged in a family planning encounter). A full-time equivalent (FTE) of 1.0 describes staff who, individually or as a group, work the equivalent of full time for 1 year. Each agency defines the number of hours for “full-time” work and may define it differently for different positions. For example, a physician hired as a full-time employee (i.e., 1.0 FTE) may be required to work only 36 hours per week. FTEs for positions with different time expectations, especially clinicians, should be calculated based on the organization’s established base for that position. In addition, FTEs are adjusted for part-time work or for part-year employment. In an organization that has a 40-hour workweek (2,080 hours/year), a person who works 20 hours per week (i.e., 50% time) is reported as “0.5 FTE.” Thus, a physician working 36 hours per week would be considered 1.0 FTE, and a physician working 18 hours per week would be considered 0.5 FTE, regardless of whether other employees work 40-hour weeks. FTE is also based on the part of the year that the employee works. An employee who works full time for 4 months out of the year would be reported as “0.33 FTE” (i.e., 4 months divided by 12 months).

QUESTIONS ABOUT TABLE 13

1. **QUESTION** – Is Table 13 different from the previous version of the table in the *Title X FPAR Forms and Instructions (Reissued January 2021)*?

ANSWER – OPA has made no changes to Table 13 in the November 2021 version of the *Title X FPAR Forms and Instructions*.

2. **QUESTION** – Can a client have more than one family planning encounter during a single, family planning visit?

ANSWER – As noted in the “Terms and Definitions” section of the report, a client may have only one family planning encounter per visit. In the family planning services setting, the term “encounter” is synonymous with “visit.” Although a client may meet with both Clinical and Other Services Providers during an encounter, only one provider is credited with the encounter. The provider with the highest level of training who takes ultimate responsibility for the client’s clinical or non-clinical assessment and care during the visit is credited with the encounter.

3. **QUESTION** – If a nurse provides a contraceptive injection (e.g., Depo-Provera), should the grantee report the encounter as an encounter with a Clinical Services Provider?

ANSWER – If the nurse providing the injection is a registered nurse with an expanded scope of practice who is trained and permitted by state-specific regulations to perform *all aspects* of the user (male and female) physical assessment as described in the Title X program requirements,⁴ then the encounter is an encounter with a Clinical Services Provider and should be reported in Table 13, Row 1.

However, if the nurse providing the injection is a registered nurse who does not have an expanded scope of practice or is another type of nurse (e.g., LPN, licensed vocational nurse [LVN], or public health nurse), then the encounter should be reported as an encounter with an Other Services Provider in Table 13, Row 2.

4. **QUESTION** – If an individual receives gynecological or related preventive health services (e.g., pelvic exam, Pap test, pregnancy test, STD screening) at a Title X-funded service site, but does not receive counseling, education, or clinical services aimed at avoiding unintended pregnancy or achieving intended pregnancy, is the encounter a family planning encounter? Is the client a family planning user?

ANSWER – If the individual is an *ongoing* family planning user who visits the service site to obtain any type of family planning or related preventive health services, the encounter is considered a family planning encounter, and the client is considered a family planning user.

If a client of reproductive age is sterilized under the service site’s Title X-funded project or is an ongoing Title X user who was sterilized elsewhere but continues to receive gynecological or related preventive health services from the site, the encounter is considered a family planning encounter and the agency may continue to count the client as a family planning user.

If a post-menopausal client obtains gynecological or related preventive health services, the encounter is not a family planning encounter and the client is not a family planning user.

If a client is not an ongoing family planning user and obtains a service that does not include counseling, education, or clinical services related to achieving intended pregnancy or avoiding unintended pregnancy, the encounter is not a family planning encounter and the client is not a family planning user.

Example: A new client who receives STD services, but no counseling, education, or clinical services aimed at avoiding an unintended pregnancy or achieving an intended pregnancy, is not a family planning user, and the encounter is not a family planning encounter. If, in addition to STD testing, this same client receives condoms or counseling about using condoms to prevent STD transmission, but does not receive counseling, education, or clinical services aimed at avoiding an

unintended pregnancy, the client is not a family planning user, and the encounter is not a family planning encounter.

REVENUE REPORT

Title X Section 1001 grantees are required to maintain a financial management system that meets the standards for grant administration and to document and keep records of all income and expenditures.² Table 14 identifies the sources and amounts of financial support received during the reporting period that support activities within the scope of the grantee's Title X family planning services project ("Title X project").

INSTRUCTIONS

TABLE 14 – Report the revenues (i.e., actual *cash* receipts or *drawdown* amounts) received during the reporting period from each funding source to support activities within the scope of the grantee's Title X services grant (Section 1001), even if the funds were not expended during the reporting period. Include (1) all receipts from the Title X services grant; (2) collections from patients and reimbursements from third parties for services rendered; and (3) receipts from other sources, including block grants, state and local governments, and other sources. If the value for a cell is zero, enter "0." The agency must retain for audit purposes all worksheets that document how the agency derived the reported amounts.² **Do not report the monetary value of in-kind contributions as revenue in Table 14.**

TERMS AND DEFINITIONS

TITLE X GRANT – Refers to funds received from the Title X Section 1001 family planning services grant. Report the amount received (cash receipts or drawdown amounts) during the reporting period from the Title X services grant. Include base Title X grant funding and other Title X funding for special initiatives (e.g., HIV integration and male involvement). Do not report the amount of grant funds awarded unless this figure is the same as the actual *cash* receipts or *drawdown* amounts.

PAYMENT FOR SERVICES – Refers to funds collected directly from clients and revenues received from public and private third-party payers (capitated or fee-for-service) for services provided within the scope of the grantee's Title X project.

TOTAL CLIENT COLLECTIONS/SELF-PAY – Report the amount collected directly from clients during the reporting period for services provided within the scope of the grantee's Title X project.

THIRD-PARTY PAYERS – For each third-party source listed, report the amount received (i.e., reimbursed) during the reporting period for services provided within the scope of the grantee's Title X project. Only revenue from pre-paid (capitated) managed care arrangements (e.g., capitated Medicare, Medicaid, and private managed care contracts) should be reported as prepaid. Revenues received after the date of service, even under managed care arrangements, should be reported as not prepaid.

MEDICAID/TITLE XIX – Report the amount received from Medicaid (federal and state shares) during the reporting period for services provided within the scope of the grantee's Title X project, regardless of whether the reimbursement was paid directly by Medicaid or through a fiscal intermediary or a health maintenance organization (HMO). For example, in states with a capitated Medicaid program (i.e., the grantee has a contract with a private plan like Blue Cross), the payer is Medicaid, even though the actual payment may come from Blue Cross. Include revenue (both

federal and state shares) from family planning waivers and State Plan Amendments (SPAs) in Row 3a, Column B. If the amount reported in Row 3a, Column B includes revenue from a family planning waiver or SPA, indicate this in the Table 14 “Note” field.

MEDICARE/TITLE XVIII – Report the amount received from Medicare during the reporting period for services provided within the scope of the grantee’s Title X project, regardless of whether the reimbursement was paid directly by Medicare or through a fiscal intermediary or an HMO. For clients enrolled in a capitated Medicare program (i.e., where the grantee has a contract with a private plan like Blue Cross), the payer is Medicare, even though the actual payment may come from Blue Cross.

CHILDREN’S HEALTH INSURANCE PROGRAM (CHIP) – Report the amount of funds received during the reporting period from CHIP for services provided within the scope of the grantee’s Title X project. If the grantee is unable to report CHIP revenue separately from Medicaid (Row 3a), indicate this in the Table 14 “Note” field.

OTHER PUBLIC HEALTH INSURANCE – Report the amount reimbursed by other federal, state, or local government health insurance programs during the reporting period for services provided within the scope of the grantee’s Title X project. Other public health insurance programs include state or local government programs that provide a broad set of benefits and public-paid or public-subsidized private insurance programs.

PRIVATE HEALTH INSURANCE – Report the amount of funds received from private third-party health insurance plans during the reporting period for services provided within the scope of the grantee’s Title X project. Private health insurance include plans obtained through an employer, union, or direct purchase, including insurance purchased for public employees or retirees or military personnel and their dependents (e.g., TRICARE or CHAMPVA) that provide a broad set of primary medical care benefits for the enrolled individual (beneficiary or dependent).

OTHER REVENUE – Refers to revenue received from other sources during the reporting period that supported services provided within the scope of the grantee’s Title X project. Other revenue sources include block grants, TANF, state and local governments (e.g., contracts, state and local indigent care programs), the Bureau of Primary Health Care (BPHC), private and client donations, or other public or private revenues.

MATERNAL AND CHILD HEALTH (MCH) BLOCK GRANT/TITLE V – Report the amount of Title V funds received during the reporting period that supported services provided within the scope of the grantee’s Title X project.

SOCIAL SERVICES BLOCK GRANT/TITLE XX – Report the amount of Title XX funds received in the reporting period that supported services provided within the scope of the grantee’s Title X project.

TEMPORARY ASSISTANCE FOR NEEDY FAMILIES (TANF) – Report the amount of TANF funds received in the reporting period that supported services provided within the scope of the grantee’s Title X project.

LOCAL GOVERNMENT REVENUE – Report the amount of funds from local government sources (including county and city grants or contracts) that were received during the reporting period and that supported services provided within the scope of the grantee’s Title X project.

STATE GOVERNMENT REVENUE – Report the amount of funds from state government sources (including grants or contracts) that were received during the reporting period and that supported services provided within the scope of the grantee’s Title X project. Do not report as “state government revenue” funding from sources like CDC or block grant funds that are awarded to and distributed by the state. Report these revenues as “Other revenue” and specify their sources.

BUREAU OF PRIMARY HEALTH CARE (BPHC) – Report the amount of revenue received from BPHC grants (e.g., Section 330) during the reporting period that supported services provided within the scope of the grantee’s Title X project.

OTHER REVENUE – Report the amount and specify the source of funds received during the reporting period from other sources that supported services provided within the scope of the grantee’s Title X project. This may include revenue from such sources as the CDC (infertility, STD, or HIV prevention; breast and cervical cancer detection), private grants and donations, fundraising, interest income, or other sources.

QUESTIONS ABOUT TABLE 14

1. **QUESTION** – Is Table 14 different from the previous version of the table in the *Title X FPAR Forms and Instructions (Reissued January 2021)*?

ANSWER – OPA has made no changes to Table 14 in the November 2021 version of the *Title X FPAR Forms and Instructions*.

2. **QUESTION** – Can a grantee report an estimate of the monetary value of in-kind donations of goods, services, or other non-cash contributions as revenue in Table 14?

ANSWER – No. In Table 14, revenues include actual cash receipts or drawdown amounts only. Do not report the monetary value of in-kind contributions as revenue in Table 14.

APPENDIX A: COLLECTING RACE DATA FROM FAMILY PLANNING USERS WHO SELF-IDENTIFY WITH MORE THAN ONE RACE

Background. On October 24, 1997, the Department of Health and Human Services (HHS) issued a *Policy Statement on Inclusion of Race and Ethnicity in DHHS Data Collection Activities*.¹⁸ This policy requires the inclusion of racial and ethnic categories in HHS-funded and -sponsored data collection and reporting systems. Implementation of this policy is intended to help to identify major health conditions of minority populations, monitor progress in meeting their needs, and ensure non-discrimination in access to and provision of appropriate HHS services for various racial and ethnic groups. Although programs that are directed to minority racial or ethnic populations have exemptions, these programs are encouraged to collect and report data on subgroups within their target populations.

The HHS inclusion policy refers to the Office of Management and Budget (OMB) 1997 *Revisions to the Standards for the Classification of Federal Data on Race and Ethnicity*,¹⁹ and any subsequent revisions, as the standard for racial and ethnic reporting categories in HHS-funded programs. The FPAR race and ethnicity categories reflect the OMB standards.

Reporting more than one race. According to the 1997 OMB revised standards, self-identification is the preferred means of obtaining information about an individual's race and ethnicity. When self-identification is used, Title X-funded agencies should adopt a method that allows users to mark or select more than one of the five minimum OMB race categories. The OMB guidance includes the following recommendations for collecting data from individuals who self-identify with more than one race:

- The method for respondents to report more than one race should take the form of *multiple responses* to a single question.
- When a list of races is provided to respondents, the list should not contain a “multiracial” category.
- Two recommended forms for the instruction accompanying a single race question that allows for multiple responses are “Mark one or more...” and “Select one or more....”
- If the criteria for data quality and confidentiality are met, provision should be made to report, at a minimum, the number of individuals identifying with more than one race. FPAR Tables 2 and 3 allow grantees to report the number of users who self-identify with two or more of the five minimum OMB race categories.

Agencies should consult with their Project Officer (PO) if they have questions about collecting multiple responses to a single race question.

Below is a sample question for collecting race data that is based on the 2011 HHS guidance²⁰ and uses the minimum set of OMB race categories. A list of resources on this topic is included below.

What is your race? (One or more categories may be selected)

- White
- Black or African American
- American Indian or Alaska Native
- Asian
- Native Hawaiian or Other Pacific Islander
